VIMMAXERS CLUB

MAXXVIM

“Mom, cancel all my
meetings,
reschedule my life,
and tell dad I love
him I can't exit
Vim.”

Some VIM stats.

Some quick stats powered to you by stats nerds and thanks stack overflow dev survey :3

12.5%

Programmers
are Vimmers.

83%

Vim users
admire
NeoVim
(switch now)

500

most-starred
GitHub users, 25.8%
maintain a public
dotfiles repository,
with neovim config.

100%

of them are
unhappy with
thier neovim
config :3

**“Ewww Vim is hard I
am using VsCODE
its better and easy
(no its not after
today)”**

SYBAU 🌹 and install NeoVim.

Go to <http://neovim.io/> and click download and run nvim in the terminal (this is for windows freaky only or if you are using some obscure distro like Justin Beiber OS)

If you are linux user I dont think I need to tell you all, macos users please use brew.

Now go to maxxim.vercel.app and run the command.
no its not going to farm bitcoins I wish it could 💔.

Before going with maxxvim features.

Some basic keybindings you should know.

These are really basic
keybindings dont blame
if you work like a snail
without it lil bro  .

just look at this once 🌹

Editing

- i → insert before cursor
- a → insert after cursor
- o → new line below
- x → delete character
- dd → delete line
- yy → copy line
- p → paste

Movement

- h → left
- l → right
- j → down
- k → up
- O → line start
- \$ → line end

Undo / Redo

- u → undo
- Ctrl + r → redo

Save & Quit

- :w → save
- :q → quit
- :wq → save & quit
- :q! → force quit

Now lets look over
maxxvim since
you all are not
snails anymore 
maxxvim.vercel.
app

MaxxVim comes with the most helpful plugins bundled

So you dont have to go in the
rabbithole of neovim plugins

And saves you time :3.
